Dear FDA:

The issue of food irradiation has come up again and again and 77% of Americans are still against it. We demand prominent labeling on irradiated food and oppose misleading labels such as "electronic pasteurization" or "cold pasteurization." The requirement for irradiation disclosure (both the label and the radura symbol) should not expire at any time in the future.

This is the least you can do. Give people the choice. Don't make a decision based on what industries want, base it on what the people want.
